NGUYEN DUONG ANH HUY

PROFILE

As a highly motivated and skilled Mobile Developer with near 2 years of expertise in utilizing Flutter. I am eager to take on Junior - Middle Mobile role where I can further enhance my knowledge, develop my technical skills, and work collaboratively with a team of professionals. My passion for learning new languages and technologies, combined with my strong work ethic, make me an ideal candidate for this position.

    - Setup the environment for build app different platforms
    - Setup FCM
  CH-Play: Bizbookly

- **BIZBOOKLY STAFF (2021 – SEP 2022) – Mobile Developer**
  Description:
    - An advanced scheduling management app for efficiently organizing and coordinating the schedules of staff members
  Technologies:
    - Back-end: Python, MySQL
    - Mobile: Flutter (GetX)
  Responsibilities:
    - Build a customer app from scratch using flutter
    - Configuration HTTP to handle Restful API – Integrate JWT to authorization and authentication
    - Setup the environment for build app different platforms
    - Setup FCM
  CH-Play: Bizbookly Staff

- **Yakult Lady (SEP 2022 - Present) – Mobile Developer**
  Description:
    - An staff's app for lady to efficiently manage and accomplish their tasks.
  Technologies:
    - Front-end: AngularJS
    - Back-end: Laravel, MySQL
    - Mobile: Flutter (Redux)
  Responsibilities:
    - Define and design user-flow according file excel from customer on Adobe XD
    - Build app from design
    - Configuration DIO to handle Restful API – Integrate JWT to authorization and authentication

- Setup the environment for build app different platforms
- Setup FCM
- Deploy app on Testflight, build APK for QC testing
- Creating a promotional campaign for the app.

- **Yakult Khai Thác (SEP 2022 - Present) – Mobile Developer**
  Description:
  - An staff's app for converting from paper processes to app processes for easier task management
  Technologies:
  - Front-end: AngularJS
  - Back-end: Laravel, MySQL
  - Mobile: Flutter (Bloc)
  Responsibilities:
  - Define and design user-flow according file excel from customer on Adobe XD
  - Build app from design
  - Configuration DIO to handle Restful API – Integrate JWT to authorization and authentication
  - Setup the environment for build app different platforms
  - Setup FCM
  - Deploy app on Testflight, build APK for QC testing

- **Gonsa Trung Tâm Dược Phẩm (SEP 2022 - Present) – Mobile Developer**
  Description:
  - An e-commerce project for buying and selling pharmaceutical products through B2B & B2C
  Technologies:
  - Front-end: AngularJS
  - Back-end: Wordpress, MySQL
  - Mobile: Flutter (Bloc)
  Responsibilities:
  - Build app from design
  - Configuration DIO to handle Restful API – Integrate JWT to authorization and authentication
  - Setup the environment for build app different platforms
  - Setup FCM
  - Payment with SmartPay
  - Deploy app on Testflight, build APK for QC testing
  - Deploy app to CHPlay and AppStore

- **GLOPR Chat App (JUNE 2023 - Present) – Mobile Developer**
  Description:
  - A chat app from glopr team
  Technologies:
  - Front-end: ReactJS
  - Back-end: NestJS, MongoDB
  - Mobile:
    - Multi-Platform: Flutter
    - Single-Platform: Kotlin, Swift
  Responsibilities:
  - Build app from design
  - Deploy app to CHPlay and AppStore

- **Kibiaccessories (Graduation Project)**
  Description:
  - Ecommerce – accessories store
  Technologies:
  - Front-end: React & Redux, ES6, AntD - Client, MUI - Admin
  - Back-end: NodeJS (Express), MongoDB
  Responsibilities:

- Build a Back-end server using ExpressJS & Mongoose
- Build a web app for customer using React, Redux & AntD
- Upload images with firebase storage
- Config Axios to handle Restful API
- Integrate login with Google, Facebook – payment with Momo, Stripe API
