

NGUYEN DUONG ANH HUY

Mobile Software Engineer (Flutter · Swift · React Native)

0348 098 023 · ngduonganh Huy@gmail.com · Ho Chi Minh City

[linkedin.com/in/ngduonganh Huy](https://www.linkedin.com/in/ngduonganh Huy) · Portfolio: holmes.id.vn

SUMMARY

Mobile engineer with nearly 5 years of experience building and shipping iOS/Android apps with Flutter, Swift, and React Native. Owned products end-to-end — from Figma design and API integration to store release — with measurable impact (cut app startup time by 60%, features driving 20K+ new sign-ups). Experienced in mentoring junior developers; seeking a Senior/Lead role with larger technical ownership.

WORK EXPERIENCE

FPT Software | Software Engineer

Mar 2026 – Present

- Maintain and develop new features for Long Chau Pharmacy app (Flutter, Golang backend).
- Built Family Account feature powering a co-marketing event with VnExpress, driving ~20,000 new family sign-ups.
- Adopted AI-assisted development via MCP integrations (Jira/Atlassian, Figma, GitLab): AI agents read tickets and Figma specs to accelerate implementation.
- Automated the delivery workflow: on task completion, ticket status is updated on Jira and commits/MRs are created through glab CLI — reducing manual overhead per task.
- Work with Marketing/PO to implement tracking events, in-app games, and promotion features.

BHD (BHDStar.vn) | Mobile Developer

Apr 2024 – Mar 2026

- Danet (movie streaming, Flutter): optimized app startup time from 5s to 2s (-60%); improved UX and shipped new features to both stores.
- DShorts (short-video app, Flutter): built new product from scratch, reaching 2,000+ downloads in the first month; set up Firebase, AdMob, and ads services.
- Danet TV (Android TV, Kotlin): proposed the Android TV platform to management, then built the app from scratch — gained 1,000+ users within the first 3 weeks of launch.
- Mentored 2 interns: reviewed their code, provided technical guidance, and reported progress to management.

GMO Runsystem | Mobile Developer

Sep 2022 – Apr 2024

- Defined user stories with BA; designed and developed apps from Adobe XD / Figma designs.
- Provided technical solutions and supported other team members.
- Configured Android/iOS builds for testing via TestFlight and Diawi; deployed to Google Play and App Store.

Exnodes | Mobile Developer

Sep 2021 – Sep 2022

- Built app UI/UX from Figma mockups; integrated REST APIs with Flutter (GetX, Bloc) and JWT auth.
- Managed source code with AWS CodeCommit; handled image storage with S3.
- Configured build pipelines for Android and iOS; managed tasks on Jira.

TECHNICAL SKILLS

- Languages: Dart, Swift, Kotlin, JavaScript/TypeScript, HTML/CSS
- Mobile: Flutter (GetX, Bloc, Riverpod), SwiftUI, UIKit, React Native (Redux, RTK Query)
- Backend & DB: Golang, Node.js, MongoDB, MySQL
- Tools: Git (GitLab, CodeCommit), Firebase (FCM, AdMob), Jira, Figma, Adobe XD, TestFlight
- AI-assisted development: MCP integrations (Jira/Atlassian, Figma, GitLab), workflow automation with glab CLI

SELECTED PROJECTS

Long Chau Pharmacy — Software Engineer

Mar 2026 – Present

Tech: Flutter, Golang

Work: Maintenance and new features for a large-scale pharmacy app; Family Account feature drove ~20,000 new sign-ups via VnExpress event.

Direct Sales — Mobile Developer

Oct 2023

Tech: React Native, RTK Query, Node.js, MongoDB

Work: Replaced paper-based direct-sales process; built app boilerplate, offline mode, FCM, and multi-platform build setup.

Smart Staff — Mobile Developer

Apr 2023

Tech: Swift, UIKit (macOS)

Work: Device and staff management app for macOS: attendance, working-hours tracking, and offline mode with automatic sync once back online.

Gonsa – Pharmaceutical E-commerce — Mobile Developer

Sep 2022

Tech: Flutter (Bloc), WordPress, MySQL

Work: B2B/B2C e-commerce app: REST API with DIO + JWT, NeoPay payment integration, released to both stores.

Yakult Khai Thác — Mobile Developer

Sep 2022

Tech: Flutter (Bloc), Laravel, MySQL

Work: Digitized paper workflows for staff; designed user flows on Adobe XD, built app, deployed via TestFlight/APK for QC.

Salonbookly (Customer & Staff apps) — Mobile Developer

2021 – Sep 2022

Tech: Flutter (GetX), Python, MySQL

Work: Salon booking platform: built both customer and staff apps from scratch, REST API + JWT auth, FCM, multi-platform builds, released to both stores.
